

## **Adlah Chisti**

### **Meet the Candidates, Week 5: Do you think Vision Zero SF has failed San Francisco? Why or why not?**

Yes but have greatly improved since and we should continue to:

1. Expedite street design with bulb outs, installing bollards at high risk intersections and bus stops and concrete dividers.
2. Create a comprehensive alternative transportation plan for District 11 that includes bike paths, transit upgrades, alternative modes of transit and pedestrian safety measures for our seniors, for our children and families in congested areas.
3. Support speed reduction by installing speed cameras including Alemany Boulevard, Geneva and Ocean Avenues.
4. Enforce moving violations. The pandemic caused staffing shortage at the SFPD and decreased moving violation enforcements. However, our police officers in District 11 work hard to continue to enforce moving violations for speeding, red lights and pedestrian crosswalk violations.
